

023 Gymleco Pec Deck

010 series, Plate Loaded

This Gymleco machine has individually loaded weight arms that share the load equally between the left and right chest muscles.

Gymleco's Pec Deck machine has adjustable angle in 5 different positions, from 2 negative positions (for lower chest muscle) and neutral position, to 2 positive positions (for upper chest muscle). The machine's back cushions are split and angled sideways. Then the deck rests quietly against the naturally outward-angled cushions, which causes the shoulders to move naturally.

- Standard frame color: Black
- Standard cushion color: Black or Red
- Easy to set up.
- Rubberized handles
- Individual arms
- The back pads are split and angled sideways for the ultimate range of motion

Lenght	Width	Height	Weight
160 cm	165 cm	90 cm	100 kg

No maintenance needs.
