

896 Gymleco Bumper Plate, Slam Ball Rack

Racks, storage & rigs

Basic rack, see next side for add-on possibilities

Here you have Gymleco's stable and robust multi storage rack which has place for both weight plates, dumbbells, wallballs, slamballs as well as barbells, jumping ropes, resistance bands and more. The shelf has two planes which gives you a flexible storage at the gym. It's space efficient and easily placed at the gym, either against a wall or in the middle of the room. It's designed with a nice looking black frame and can be attached to the floor. A great Gymleco rack for commercial gyms and other professional training facilities.

The shelf has many options. You can choose to build both in height and in width and you have multiple options for specific gym equipment. This to tailor the shelf to your needs and requirements.

See how you can add parts to make the perfect storage on next side.

- Great storage for gyms and other professional training facilities
- Can be increased in both width and height
- Choose your own add ons depending on your needs
- Can store a lot of weights and other training equipment
- Black frame
- Can be attached to the floor

Width	Depth	Height
120 cm	40 cm	108 cm

Maintenance free
Clean with gentle detergent

Gymleco®

Build your Gymleco storage depending on your needs and requirements

You can adjust your 896 completely to your needs. Build three shelves if you want to be able to fit a lot in a small surface. Increase the shelf in width if you want a lot of equipment and everything collected in one place. Mix different shelves to make sure that all your equipment has a place in the rack. Add an accessories holder and storage for your barbells to make sure that your equipment doesn't end up on the floor.

See above for all add-ons and examples on next side how the end result can look. Contact us and we will help you plan the best solution for you and provide you with an offer.

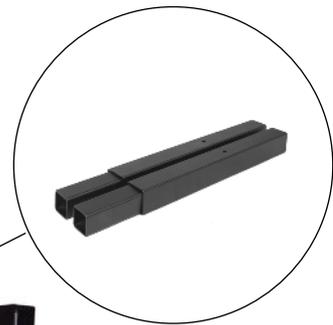

896-3 Shelf for kettlebells or similar equipment. Can also be turned to store weight plates.

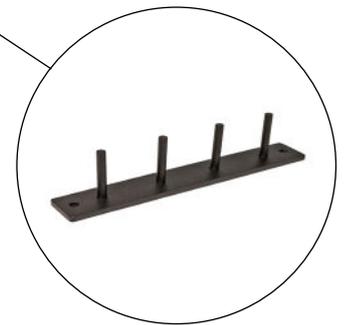

896-6 Weight support to make sure that the weights stay in

896-5 Pillars (2-pack) to increase your shelf in height

896-1 frame pillars to increase your shelf in width.

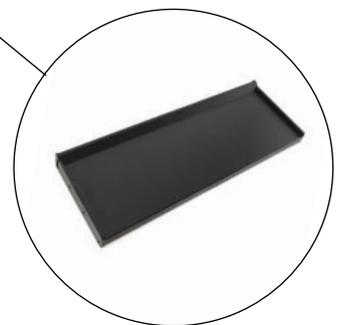

896-7 Accessories holder which is attached at the end of the shelf.

896-8 Storage for 3 barbells which is attached at the end of the shelf.

896-2 Shelf for your weight plates.

896-4 Shelf for your hex dumbbells.
