

L7509L Gymleco Crosstrainer, commercial elliptical with big LED display

This professional crosstrainer is a stable and quiet cardio machine. Thanks to its smooth movement for both the upper and the lower body, the crosstrainer is a very good training machine for those who want to activate the whole body.

This crosstrainer is the obvious choice for any serious gym. Firstly it's designed with long steps to fit everybody that trains at the gym and is easy to start training with. Secondly you can choose to just start pedalling and increase the resistance, or you can run various different programs for an extra motivation.

Furthermore the display is easy to understand and use. Even more you save on cost. Since the cardio machine is generator driven which means that it does not need any power. The exercise machine has sturdy and stable pedals and handles as well as very stable joints with large ball bearings. The construction of the cardio machine makes it suitable for environments with relatively low ceiling height. It fits well in the commercial gym but also in company gyms, club gyms and other training facilities where durable cardio machines are needed.

- Led Display
- Cordless generator driven
- The display shows time, distance, speed, rpm, level, calorie consumption, heart rate and power.
- The machine has 18 different programs, of which 1 is manual, 4 heart rate controlled and 1 personal for the user.
- The step length is 49 cm

Length	Width	Height	Weight	Max User Weight
238 cm	68 cm	160 cm	112 kg	180 kg

- Clean with a gentle detergent.
- Always clean the machines with electricity off.
- Keep your machines free of dust and dirt by continuously vacuuming in, under and around the machine.

- Cleaning with alcohol can damage the machine parts and shorten the lifespan.
- Do not expose the products to damp environments or liquid.
